Übung zur Vorlesung
Mensch-Maschine-Interaktion 1

Doris Hausen, Alexander Wiethoff
Ludwig-Maximilians-Universität München
Sommersemester 2010
Heuristic (hyuˈris-tik) is a method to help solve a problem, commonly an informal method. It is particularly used to rapidly come to a solution that is reasonably close to the best possible answer, or 'optimal solution'.
Visibility of system status

User control and freedom

Consistency and standards

Error prevention

Recognition rather than recall

Flexibility and efficiency of use

Aesthetic and minimalist design

Help users recognize, diagnose, and recover from errors

Help and documentation
