

28.11.16

Designworkshop II

First Draft Prototype & User Test Planning

Milestones & Deliverables: Low-Fi Prototyping

Low-Fidelity Prototyping

28.11.16 First Draft Prototype & User Test Planning

05.12.16 Review Results User Testing & Concept Iteration

12.12.16 **Deliverable 3:** Low-Fidelity Prototype based on User Feedback

12/12 Low-Fi Prototype & User Testing

A horizontal timeline is shown with a green bar. The months October, November, Dezember, and January are labeled below the bar. Two red triangles mark specific dates: one at the end of November and one at the end of Dezember. A blue line connects the top of the second triangle to a callout box containing the text '12/12 Low-Fi Prototype & User Testing'. An orange bar highlights the period from the first triangle to the second triangle.

October

November

Dezember

January

Until 5.12.16

Present a new iteration of your prototype:

- Show how you developed your concept further
- Increase resolution of your prototype
- Increase fidelity of your prototype

Present your user research with descriptions and pictures – minimum 3 test users:

- Who did you talk to and why did you choose these profiles as test users?
- How was the overall set up of the user research and why?
- What was your goal of the user testing? What did you want to find out and test?
- What tasks did you give them and why?
- Show your questionnaire and explain why and how you conceived it
- Briefly share each testing session: How did it go and what did you find out?
- Summarize the user feedback across all sessions and show a list of several ideas per insight on how to approach them.
