

Smart graphics: Overview of lecture content, rules & conditions

Lecture „Smart Graphics“
Andreas Butz, Sebastian Boring

19.10.2005

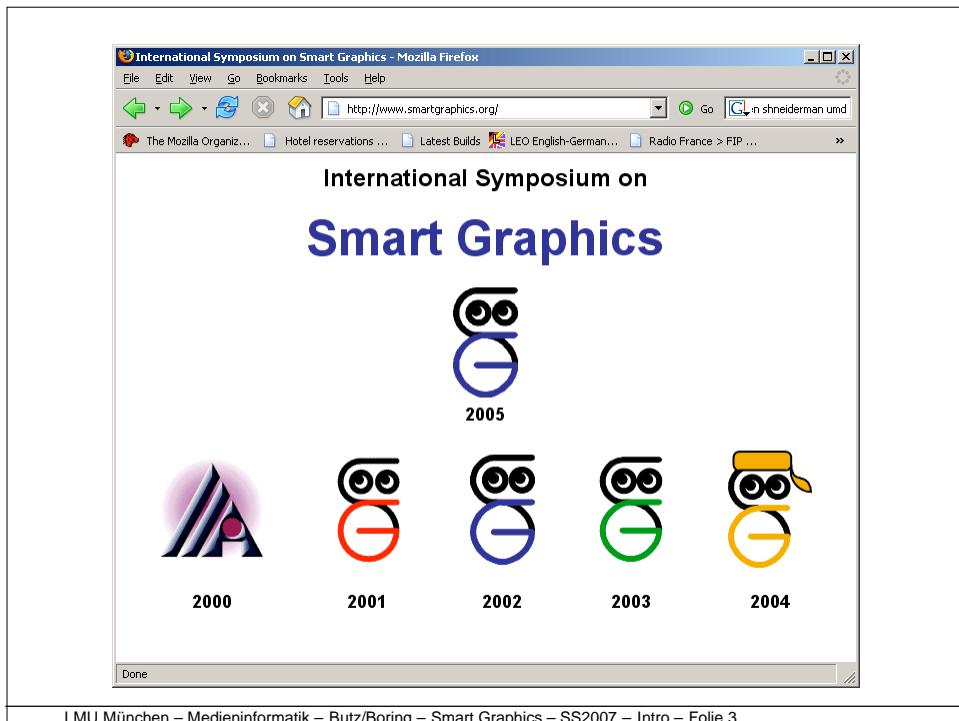

LMU München – Medieninformatik – Butz/Boring – Smart Graphics – SS2007 – Intro – Folie 1

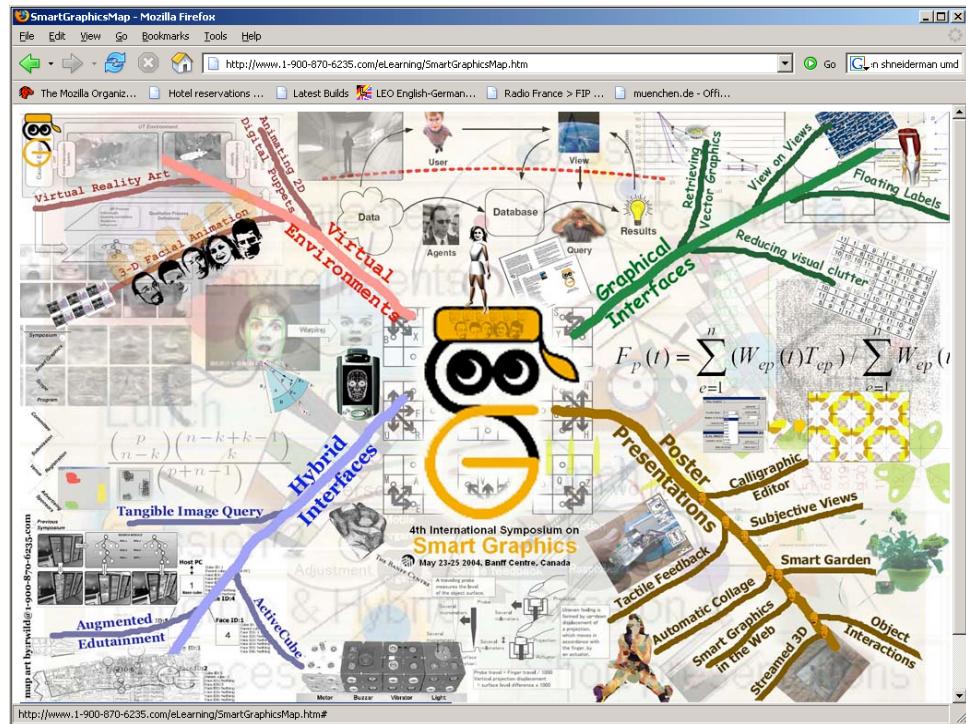

Topics Today

- The term “Smart Graphics”
- Topics of the lecture
- Exercises
- Conditions for getting the certificate
- Useful resources

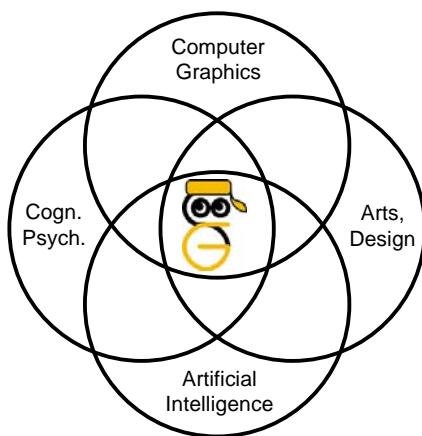

LMU München – Medieninformatik – Butz/Boring – Smart Graphics – SS2007 – Intro – Folie 2

LMU München – Medieninformatik – Butz/Boring – Smart Graphics – SS2007 – Intro – Folie 4

Goal: 4 disciplines talking to each other

- Designers have produced graphics forever
- Psychologists tell us how humans perceive and process
- AI provides the tools to use this knowledge
- Computer Graphics provides the medium

Examples of Smart Graphics

LMU München – Medieninformatik – Butz/Boring – Smart Graphics – SS2007 – Intro – Folie 7

Mapmaker (Agrawalla & Stolte, SG 2000)

- Ziel ist die automatische Generierung von Wegskizzen
- Berücksichtigung von Designregeln
- Gute Verständlichkeit und Handhabbarkeit

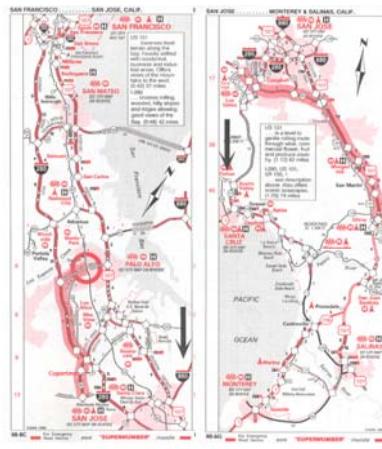

LMU München – Medieninformatik – Butz/Boring – Smart Graphics – SS2007 – Intro – Folie 8

Motivation

- Statisches Kartenmaterial

(a)

(b)

LMU München – Medieninformatik – Butz/Boring – Smart Graphics – SS2007 – Intro – Folie 9

Motivation

- Schlechtes dynamisches Kartenmaterial

(a)

(b)

MapBlast

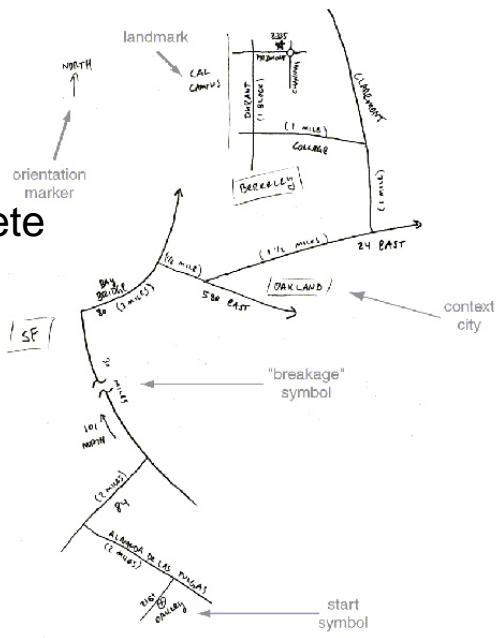

LMU München – Medieninformatik – Butz/Boring – Smart Graphics – SS2007 – Intro – Folie 10

Vorbild

- Handgezeichnete Wegskizzen

Vorteile:

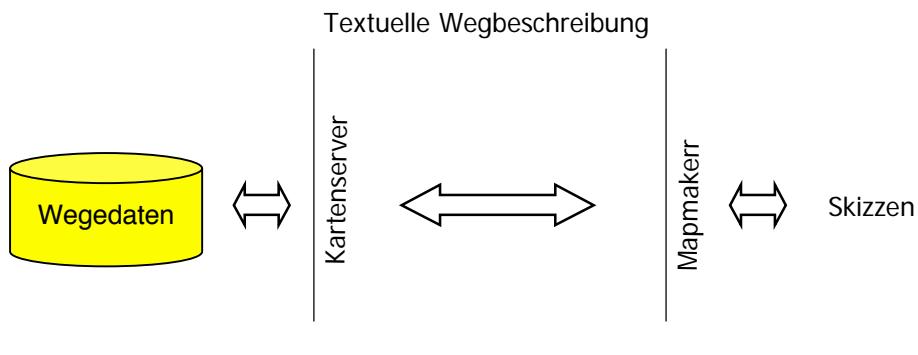

- Auswahl der Details
- Intelligente Skalierung

Designkriterien für Karten

- Lesbarkeit
- Prägnanz
- Vollständigkeit
- Verfügbarkeit

Skizzengenerierung

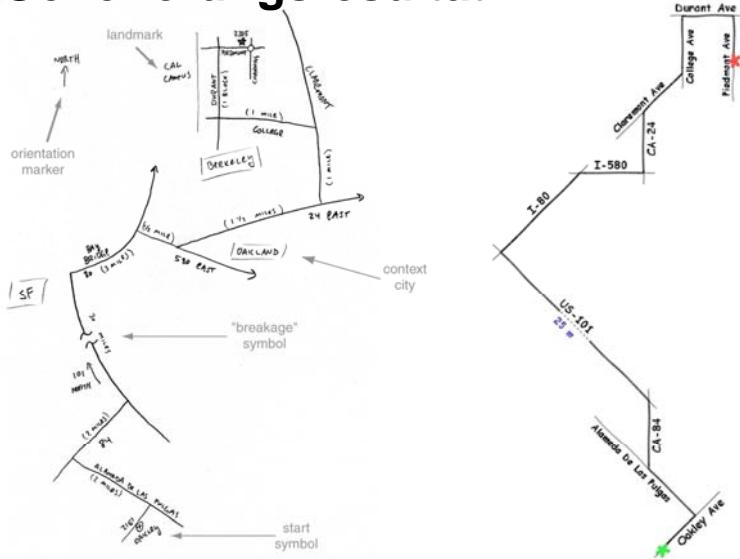

LMU München – Medieninformatik – Butz/Boring – Smart Graphics – SS2007 – Intro – Folie 13

Generierungsschritte

- Plazierung der Wegstrecken
- Plazierung von Bezeichnern
- Hinzufügen von Hilfselementen
- Realisieren des „handgezeichneten“ Stils der Wegskizze
- Kriterium:
 - Längenverhältnisse müssen erhalten bleiben

LMU München – Medieninformatik – Butz/Boring – Smart Graphics – SS2007 – Intro – Folie 14

Generierungsresultat

(a) Hand-Drawn Map

(b) System Generated Map

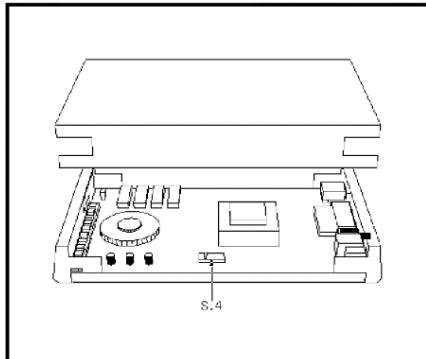

Planbasierter Graphikdesigner

(André & Rist 1995)

- Generiert funktionelle Graphiken ausgehend von einem Präsentationsziel
- Benutzt allgemeine Designregeln und Wissen über die Domäne
- Realisiert Graphiken mithilfe gängiger Illustrationstechniken

Beispiel aus WIP

Set the code switch S.4 to R in order to set for reception. Connect the plug of the telephone. Press the on/off switch in order to turn on the modem. The LED L.11 lights up after turning on the modem.

LMU München – Medieninformatik – Butz/Boring – Smart Graphics – SS2007 – Intro – Folie 17

About the lecture & exercises

LMU München – Medieninformatik – Butz/Boring – Smart Graphics – SS2007 – Intro – Folie 18

3 main parts of the lecture

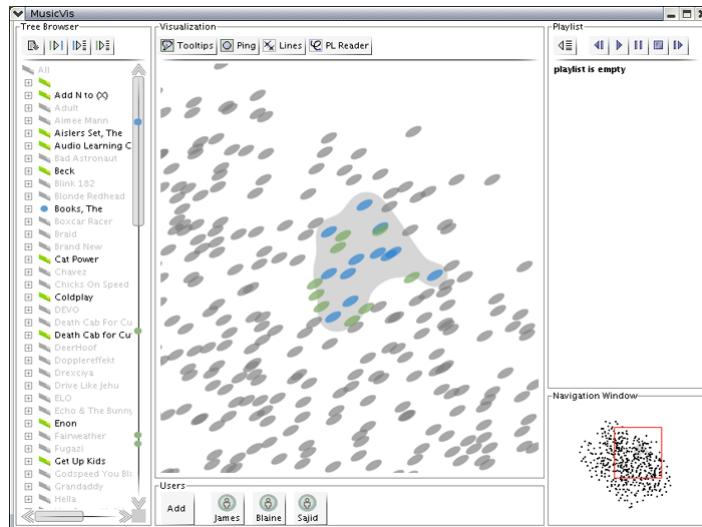

- Motivations
 - Graphics & psychology
 - Graphics & arts & design
 - Graphics & communication
- Methods
 - A collection of AI tools and formalisms
 - How they can be applied to graphics
- Milestones
 - Examples from various fields

Exercises

- A few warm-ups in the beginning
 - Mainly about perception
- One major class project (in infoviz)
 - Base concept, criteria
 - Choice of tools
 - Implementation of a working demo
 - Documentation in the form of a research paper
- Groups of 2-4 students
- Final presentation at the end of the semester
 - Short talk explaining what and how
 - Demo of the implementation
 - Will be open to the public

Example student project: MusicVis

(Blaine Boman, James Pak, Sajid Sadi, Columbia University)

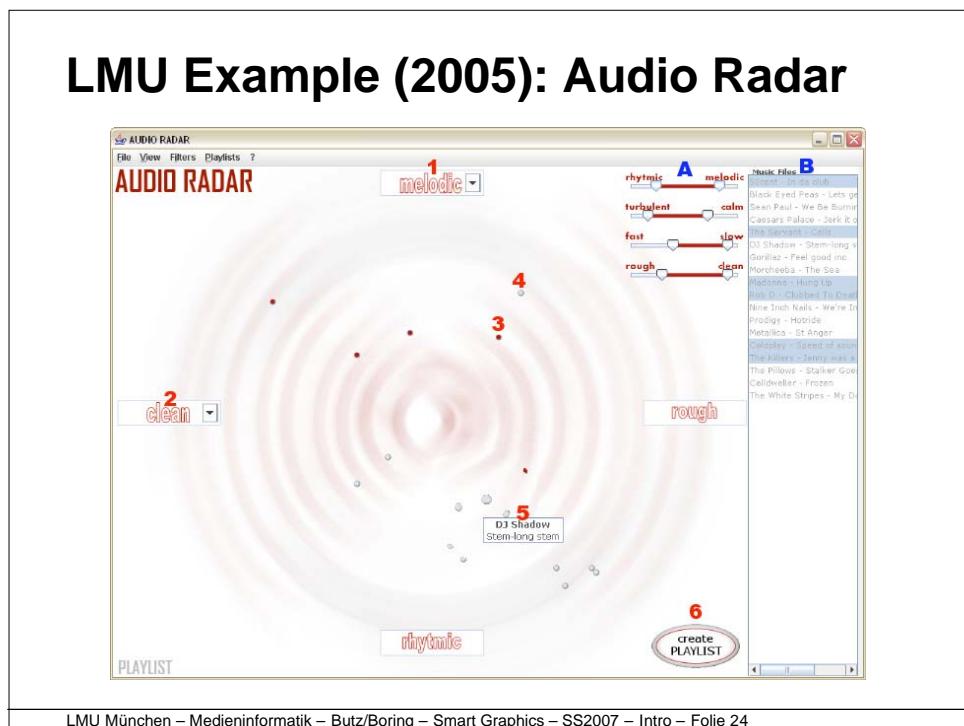

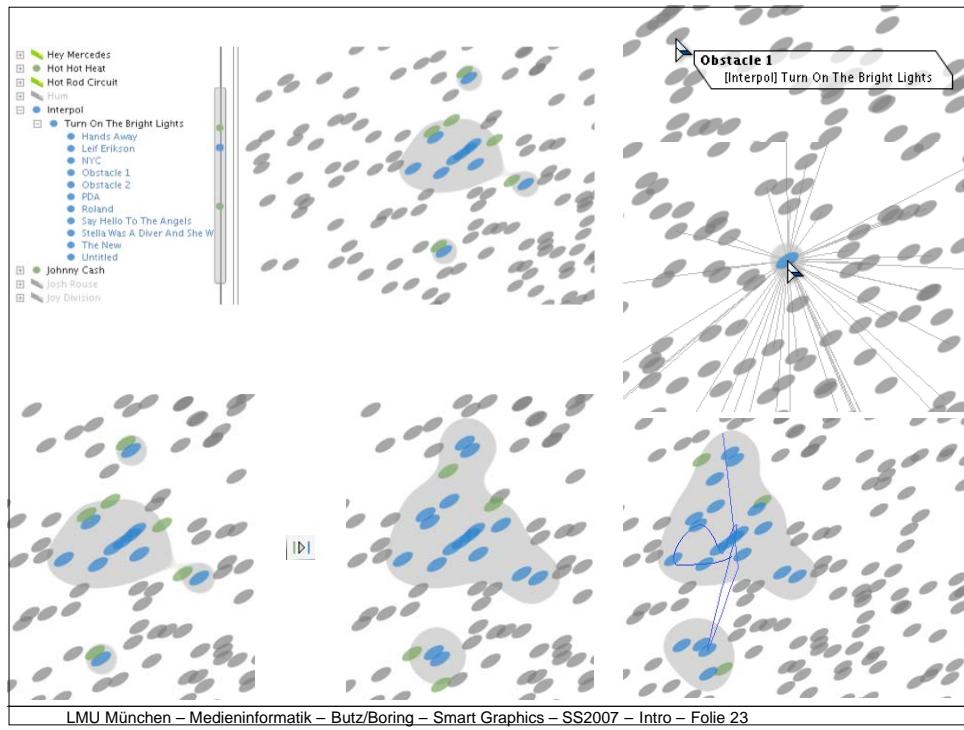

LMU München – Medieninformatik – Butz/Boring – Smart Graphics – SS2007 – Intro – Folie 21

MusicVis (cont'd)

- Visualization of MP3s in a starfield and a tree (coordinated displays)
- Mouse interaction with this visualization
- System learns which songs..
 - have been played closely together
 - are in the same playlist
- Formalism: Markov Model
 - Prediction of next song based on history
