

Exercise 9 – Mensch-Maschine-Interaktion 1

Design Walkthrough

Follow the subsequent steps with your group (3/4 people):

- 1. Present your video-prototype**
Present your video-prototype to the rest of the class (turn the sound off if any). Show the video once without pausing for the audience to get a first idea of what your project is. Then play the video again, pausing between each sequence. As in a brainstorming, the goal of a Design Walkthrough is to get as much feedback as possible in a limited period of time, you should refrain from justifying your choices, just take note of the comments, it is ok to disagree.
- 2. Comment the video-prototypes of the other groups**
As the other groups present their video-prototypes, provide feedback on the interaction. As in a brainstorming the feedback should be constructive: critical comments should be combined with suggestions on how to improve the design.
- 3. Write down the comments** you had on the video-prototypes of the other groups.

Submission:

- Submit the comments your group made to others in one **PDF** via UniWorx.
The format should be:
Group 1 - project title
 - 1. Comment 1*
 - 2. Comment 2*
 - 3. ...**Group 2 - project title*
 - 1. Comment 1*
 - 2. Comment 2*
 - 3. ...*
- Deadline: 12.07.2012 13:00
