

Information Visualization Tutorial WS 2009/2010
Dominikus Baur

X: 28.01.2010 - **02.02.2010**

Task 1 - Prepare your presentation

- a) Find a suitable template for your presentation. Use the rough structure:
 - Motivation and Data set
 - User Tasks
 - Visualization + Interaction
 - Demo
- b) You'll have 15 minutes (+ 5 minutes for questions). Prepare visually appealing and -centric slides.
- c) Write a short script for your live demo (in what order to present what features, what to say at different points, etc). Prepare a data set for that.
- d) Send slides and script to dominikus.baur@ifi.lmu.de.

Task 2 - Tidy up your wiki-page

- a) Make sure that your wiki-page gives a good overview of your project. Add screenshots and a summary of what you did if necessary. Make sure that demo + source are available and working.
- b) Upload the source code plus a working demo (i.e., executable file and required example data) to your wiki-page.

All Tasks are due on **02.02.10 (Tuesday)**!
