Praktikum

Geometry Processing

Organization

Ludwig-Maximilians-Universität München
About

Changkun Ou, M. Sc.
changkun.ou@ifi.lmu.de
Assistant

Prof. Dr. Andreas Butz
butz@ifi.lmu.de
Professor
Pre-survey!

What's your initial expectation about this course?

https://forms.gle/B5nDtMY695GsNDwY9
Registration & Timetable (tentative)

- Register via Uni2Work. Important:
  - Bachelor students
    - [link](https://uni2work.ifi.lmu.de/course/W20/IfI/GP)
  - Master students
    - [link](https://uni2work.ifi.lmu.de/course/W20/IfI/PGP)

- Time: Monday 14:00 - 18:00
  - 14:00 - 16:00 Topics of the Day
  - 16:00 - 18:00 Discussion & Hacking

- Zoom: [link](https://lmu-munich.zoom.us/j/98754182746)
  - Password: <sent-via-un2work>

Communications

- We use Github for all communications
  - [https://github.com/mimuc/gp/tree/ws2021](https://github.com/mimuc/gp/tree/ws2021)
  - Including skeletons, slides, submissions, …

  **Issues:** discuss your questions, project ideas, etc.

  **Pull request:** submit your code, contribute to the course, etc.
Grading (50%): Coding Projects

- Format similar to SS20 CG1 tutorials
- Project difficulty depends on the actual topics
- (50%) You can decide to do 5 out of 6 given projects (5x10%), or
  - feel free to finish them all (no bonus, but you will learn more)
- Project will be released as homework after each session
- Coding skeleton will be provided, most likely 100~1000 LOC
- Solutions will be discussed in the subsequent sessions
Grading (50%): Individual Project

- (10%) Write a project proposal before you start implementing it
- (40%) Submit code and a 2~5 minutes presentation in video format
Late & Cheat Policy

- Late submission: 0.005% subtraction for every minute late (2000 minutes tolerance)
- Cheating: You don't.
  - Coding projects will surround the re-implementation of well-known GP algorithms, workflows, etc.
  - If one sent a pull request, then he/she's the solution will be visible publicly
  - We will discuss the solution anyway
  - If you found someone plagiarize your submission, ask the person to stop privately; if you can't find consensus together, please talk to me
  - If you just want a pass, we do not recommend participation in this course
  - You don't want to cheat because you take responsibility for your own study
Literature
